HAMMER

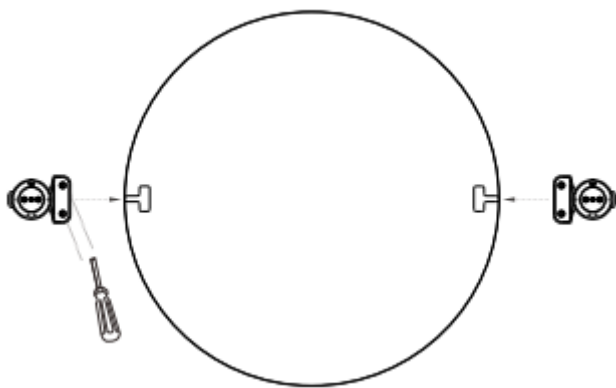

8mm DRILL BIT

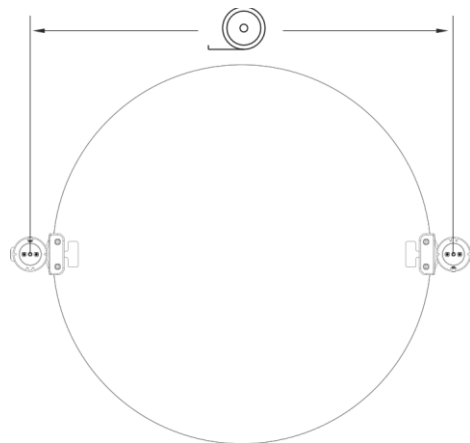

PENCIL

Installation

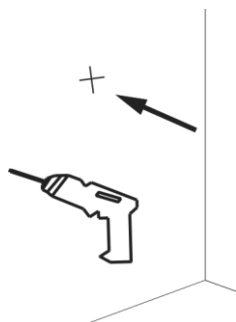

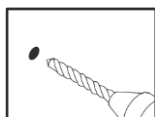

This mirror is supplied with two brackets to mount the mirror on the wall, ensuring that the mirror can be swung up and down. Before attempting installation, the mirror should be unpacked and inspected for signs of damage

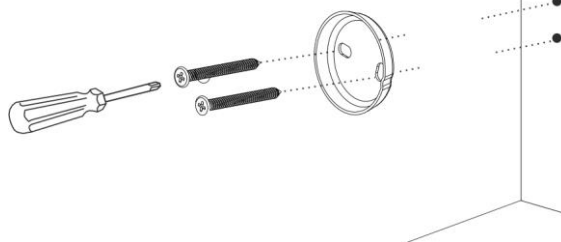

1. Fix the bracket onto the metal pad of mirror with screwdriver.

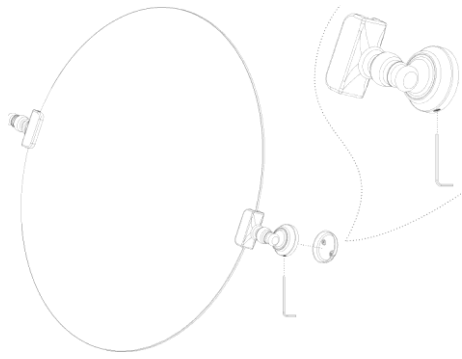

2. Measure the distance between the four key holes, make a note of the distance and mark their position on the wall. Use a spirit level to ensure that the holes are level.

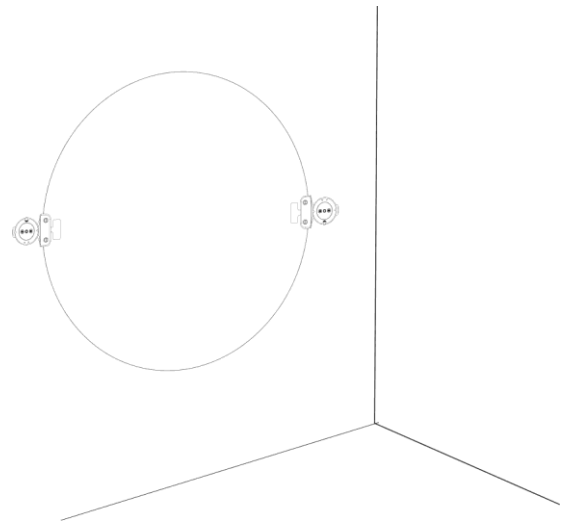

3. Drill the 4 holes into the wall at the position marked using a suitable drill bit.

4. Put D6 expansion screw into drilled hole, and fix the metal cap onto the wall with screwdriver (D6 expansion screw only for solid wall).

5. Fix the bracket onto the metal cap with hex wrench.

6. Please ensure the mirror installed firmly and securely.

Warm tips:

1. Please do not use, if the product has any breakage.
2. During operation, never put hard and sharp materials directly against the mirror surface.

CLEANING AND MAINTENANCE

Never use products containing bleach or abrasive cleaners, as these will have a detrimental effect on the appearance and lifespan of the product. Use a clean micro fiber cloth to clean the mirror.
