

PENDLE RANGE BATHROOM FURNITURE FITTING GUIDE

Tools required for installations

Note: For safety reasons Unit must be secured to the wall using suitable fixings (pre-drilled holes provide in back panel of unit)

When fitting a basin to a unit, a bead of silicone should be applied to the top edge of the basin unit to seal between the basin and unit.

Please spend 5 minutes reading this section before commencing with the installation of your new furniture.

1. Should any of your items have a defect, please do NOT install as returns will not be accepted once fitted.
2. We advise that you use a qualified person to install your units, as any issues relating to poor fitting will not be accepted by the supplier.
3. You have purchased a handmade and in some cases hand painted product. Therefore, you may see some slight imperfections which the supplier may deem as acceptable.
4. This product is water resistant but NOT waterproof. On no account should any spillages or splashes, even water, be allowed to lie on any surface. All spillages and splashes should be wiped dry, failure to do so may shorten the life expectancy of the product and invalidate any guarantees.
5. Please avoid direct sunlight as this will cause the painted surfaces to discolour.
6. Due to motion in transit, the cabinet doors and drawers may need to be adjusted after installation.
7. Floor Standing units must be fitted back to the wall through the backrail using suitable fixings. (not supplied)
8. Basin units should be fitted as above. The basin should also be secured where applicable using Fischer bolts through the fixing points under the basin. (not supplied) Note that not all basins have this facility.
9. Wall Hung units must be secured back to the wall using the wall hanging brackets or suitable wall fixings when not supplied. Additional support is recommended using 'L' brackets. (not supplied)
10. When fixing to a stud or panelled wall, appropriate frame work should be installed to support the basins and units.
11. Where units or worktops have to be cut-out for services, all raw edges MUST be sealed against water ingress.

Hinge Adjustment

Drawers Remove/Install

To Remove the Drawer: Follow step 'A' and remove the fastener then follow step 'B'.

To Install the Drawer: Follow step 'B' and then follow step 'A' to lock the fastener.

Drawer position: If drawer position needs altering follow step 'C' to adjust the screw.

BATHROOM FURNITURE CUSTOMER CARE GUIDE

Please note that although these units have been designed to give years of pleasure and satisfaction, you will help maintain the original beauty of your bathroom by following these guide lines.

Melamine, Vinyl and Foil Wrapped Doors

Occasional marks, can in most cases, be removed with a soft damp cloth. More persistent marks can be removed using a non silicone based furniture cleaner. Hot soapy water should be avoided. Once the mark is removed, the area should be wiped over with a damp cloth to remove any excess and dried with a soft clean cloth. On no account should solvent or an abrasive cleaner be used as permanent damage to the finish could take place.

High Gloss Doors

Use a cleaning product not containing aggressive substances like acetone, alcohol, bleach ... as those components could seriously damage the surface of the door. The best would be to use a soft cotton or micro fibre cloth with only water and soft soap (containing a maximum 1% of liquid soap)

Carcase Components

Do not use polish on any surfaces. A damp cloth with soapy water will clean off most marks or spills. Bleaches, scouring pads and multi-surface cleaners should not be used.

Drawers, Runners, Door Hinges

These should be wiped out with a damp soapy cloth and wiped dry with a soft cloth as necessary. The roller runners and hinges are lubricated and should not be cleaned with a degreasing agent as this will affect the action of the moving parts. Never lean on partially or fully opened doors and drawers in order to gain access to the units. The hinges are specified to adequately support the weight of the door, plus small additional weights such as wire accessories. It is advised that once the bathroom has been installed you should check every six months that all screws on the hinges are tight.

Worktops

Although the worktop is hard wearing, sharp objects will scratch and excessive heat will scorch the surface. Care should be taken not to drop any heavy objects onto the worktop as the surface may crack. For cleaning, a damp soapy cloth will clean off most spills. Bleaches, scouring pads and multi-surface cleaners should not be used. Corrosive liquids and make-up should be wiped off immediately. On no account should any spillage, even water, be allowed to lie on the surface.

Temperature and Humidity

Avoid excessive change in temperature and humidity. Always try to ensure adequate ventilation.

General care, spillages and splashes

On no account should any spillages or splashes, even water, be allowed to lie on any surface. All spillages and splashes should be wiped dry, failure to do so may shorten the life expectancy of the product and invalidate any guarantees.

Wall hung unit installation.(fixings in box)

Please measure the L distance between each brackets on unit. and H (height as customers request. The standard height is 850mm (including basin height) from floor to wash basin

Mirror cabinet and Storage unit. (plug screws with chrome covers in box)

Please measure the L&H distance between each pre-drilled holes on products.and fixing them as below steps.the distance will be 300-400 the mirror cabinet to basin as below . the distance from floor to bottom of storage as customer requests.

STANDARD BATH PANEL FITTING INSTRUCTION

1. MEASURE FROM THE UNDERSIDE OF THE BATH RIM TO THE FLOOR TO ESTABLISH THE HEIGHT OF THE BATH PANEL REQUIRED.
2. DRILL EQUALLY SPACED HOLES ALONG THE PLINTH AND SCREW TO THE BOTTOM EDGE OF THE MAIN PANEL AT THE DESIRED HEIGHT.
3. IT IS ADVISABLE THAT YOU BUILD A FRAMF OR FIT BATTENS ALONG THE FLOOR AND DOWN THE WALL SIDES TO SUPPORT THE PANEL.
4. WHEN AN END PANEL IS USED, IT IS NECESSARY TO TRIM THE PANEL & PLINTH TO LENGTH. ANY TRIMMING SHOULD BE DONE AT THE WALL END TO ENSURE THAT THE FINISHED EDGE IS AT THE VISIBLE CORNER. THE FRONT AND END PANELS ARE FASTENED TOGETHER USING THE SCREWS & CORNER BARCKETS PROVIDED.
5. ANY CUT OR TRIMMED EDGES MUST BE SEALED AGAINST WATER INGRESS. IT IS ALSO ADVISABLE TO SEAL ALL THE OUTER EDGES OF THE PANELS AND IN PARTICULAR THE UNDERSIDE OF THE BATH LIP WHERE THE PANEL MEETS.

SQUARE SHOWER BATH PANEL ASSEMBLY INSTRUCTIONS

1. Push the Cams into the pre-drilled holes in the back of panels A,B,C and D as shown below.
2. Screw into place the Cam pins as shown.
3. Push and glue in place the wooden dowels.
4. Glue all edges that are to be butted together, being careful not to get any adhesive on the decorative surfaces. Push the panels together one at a time and tighten by turning the Cams in a clockwise direction.
(any excess adhesive must be removed immediately with a damp cloth)
5. Fit the Corner Post between panels B and C. This can be fitted after the Bath has been installed if required.
6. Instruction shows the panel assembly for a L/H shower bath. For a R/H version assemble the panels in reverse.
