Important information

- Please read these instructions thoroughly and retain for future reference
- Always check for pipes and cables before drilling

Parts

1 x Basin

Tools required

Glue, drill and hole cutter

Installation

1. Please pre-drill the faucet hole to ensure a proper fit with the product's faucet hole.

2. Carve according to the size of the ceramic insert. Seal the inside and exposed edge after cutting to prevent water or moisture penetration.

3. Try to place the product on the countertop and make sure it can be easily reached.

4. Fit the basin waste to the basin as shown (and follow waste instruction).

5. The water inlet has been properly installed.

6. Place the sink in the correct position so that the faucet hole can align with the drilled hole. All the areas where the countertop and the ceramic meet should be sealed with glue for fixation. (No adhesive provided)

Please note: Allow all sealant to dry for at least 24 hours before use 

Cleaning

To maintain the surface finish of your product, wipe clean after every use, using a clean damp cloth, a mild detergent mixture can be used. Do not use abrasive cleaning agents or materials which can strip and scratch the surface; the use of these agents or materials can invalidate your guarantee.
