Tools Required

Safety Notice:

Prior to drilling into walls, check there are no hidden electrical wires, cables or water supply pipes. Always wear protective equipment such as safety glasses and hearing protection whilst using power tools.

Tools for installation (not supplied)

 Electric drill	 PTFE Tape	 Spirit Level
 Wrench	 Screw driver	

Installation Notices

Before Installation, please read this guide carefully.

- A fully qualified and competent person should install this product.
- Observe all local plumbing and building codes.
- Shut off the main water supply.
- The radiator should only be filled with water at a temperature below 100 °C . If the temperature exceeds 48 °C , please install a warning sign near the product to avoid burning and scalding accidents.
- Select the desired location for the radiator ensuring the chosen wall is both strong enough and suitable to carry the weight of the radiator when full of water.
- When cleaning, never use abrasive cleaners on this product as they will damage the surface. Wipe the surface clean with a soft, damp cloth.

Installation Instructions

Step 1

Connect the 4 long screws & bracket bodies to the towel radiator as below image.

Step 2

Position the towel rail in desired location. Check for level and mark the screw hole positions to be drilled for the brackets.

Make sure the towel rail is installed vertically.

Before installation place a dust sheet on the floor to prevent losing any small parts.

Step 3

Using the correct sized masonry drill bit drill holes and insert wall plugs. For false or studded you may require different fixings and can be purchased from your local DIY store.

Step 4

Fix all the wall supports to the wall as below image by using a screwdriver.

Step 5

Wrap PTFE tape around the blanking plug and vent plug threads then proceed to insert into the top of the radiator tightening with a spanner.

Repeat the procedure and install the radiator valves in the bottom tapping's.

Step 6

Slide the brackets into the wall supports and tighten all the screws when in the desired location. Be sure to check for level at all stages.

Marks: The product also can be converted to electric heating. The rail need to be filled with a water (80%) and glycol (20%) mixture if you want to convert central heating to electric one, also allow 5% as leaving room for expansion.

Product Code	Fill Volumes
ORDMB850	4.5L
ORDMB1300	6.8L

After installation

- After the above installation, turn on the water supply and using the flathead screwdriver, open the air vent via the central screw, open the inlet valve and let the water rush into the radiator. Check all connections for leaks.
- Once water overflows from the air vent, this means that there will be no air bubbles present.
- Use a screwdriver to close the air vent and then the radiator is ready to use.

Cleaning

This radiator is made from steel with a painted finish. To maintain the surface of your product (especially when subjected to steam or splashes), wipe with a clean damp cloth and wipe dry.

Do not use abrasive cleaning agents or materials which can strip and scratch the surface; the use of these agents or materials can invalidate your guarantee.

It is recommended to wipe and dry on a regular basis.
